

DEMO-ZK-001

Borehole Log

SYNTHETIC TUTORIAL SAMPLE - no real customer or project information

Field	Value
Project name	CloudSigma Demonstration Survey A
Borehole identifier	DEMO-ZK-001
Sample location	Fictional Area A
Final borehole depth	35.8 m
Prepared on	2026-08-20

Layer	Depth range (m)	Thickness (m)	Material description	Field notes
1	0.0 - 2.4	2.4	Mixed fill; uneven composition	Loose
2	2.4 - 8.6	6.2	Silty clay with local sand	Plastic
3	8.6 - 18.0	9.4	Fine sand; moderate grading	Medium dense
4	18.0 - 27.5	9.5	Highly weathered sandstone	Broken core
5	27.5 - 35.8	8.3	Moderately weathered sandstone	Mostly intact core

All identifiers, dates, measurements, and descriptions are fictional. This document must not be used for real engineering decisions.
