

DEMO - ZK - 002

Borehole Log

SYNTHETIC TUTORIAL SAMPLE - no real customer or project information

Field	Value
Project name	CloudSigma Demonstration Survey B
Borehole identifier	DEMO - ZK - 002
Sample location	Fictional Area B
Final borehole depth	48.2 m
Prepared on	2026-08-21

Layer	Depth range (m)	Thickness (m)	Material description	Field notes
1	0.0 - 3.1	3.1	Fill with some gravel	Slightly wet
2	3.1 - 12.0	8.9	Sandy silty clay	Stiff
3	12.0 - 24.6	12.6	Medium sand with local gravel	Dense
4	24.6 - 36.0	11.4	Highly weathered granite	Many fractures
5	36.0 - 48.2	12.2	Moderately weathered granite	Intact core

All identifiers, dates, measurements, and descriptions are fictional. This document must not be used for real engineering decisions.
